

## **A practical introduction to Renewable Energy Technologies**

BRE Training has launched a series of renewable energy courses to provide a basic introduction to Solar Thermal, Solar Photovoltaics and Heat Pump technologies. The courses begin in February and will be held in two locations; BRE Watford and Salford University, Manchester.

The courses will assist delegates to make a fundamental assessment of the suitability of a particular renewable technology, explain the need for energy efficiency and conservation and provide an overview of the basic design and integration of the technology.

Further information is available at: [www.bre.co.uk/training](http://www.bre.co.uk/training) or call: 01923 664829.

### **Notes for Editors**

#### **BRE Training – *positively changing peoples' lives***

BRE Training is a leading, high-quality training provider and assessment centre for programmes which either lead to National Vocational Qualifications (NVQ) or contribute to Continuous Professional Development (CPD) courses focus on Energy, Sustainability, Fire, Regulation/Legislation, Security, Innovation, Health and Safety, Intelligent Buildings, Specification and Design.

BRE Training is the focus for the delivery of training by the BRE Group.

BRE and BRE Global are the two main companies owned by the BRE Trust, a charitable organisation representing interests across the built environment sector. The Trust uses the profits made by its companies to fund research and education that advances our knowledge on the built environment. The BRE Group has a long tradition as a national centre of excellence for construction.
