WILO PUMPING UP INTEREST AT HEVAR 2010

As it has been for several years, leading pump manufacturer Wilo UK is an important component of the 2010 series of HEVAR shows across the country.

Wilo, patron of CIBSE, continues to make great strides in the pump and pumping system marketplace, as it continues to gain recognition for its high quality, energy efficient pumps and pumping systems with specifiers, contractors and installers across the UK, who will be visiting the shows to find new ideas and new suppliers capable of meeting their very particular pump-based needs.

“HEVAR is now a very important show for us each year,” says Wilo’s Sales Director Dan Wild. “It gives us the opportunity to meet face to face with busy mechanical and electrical contractors and engineers, building services engineers and local authority specifiers and engineers in their own back yards. We see a great cross section of these people under one roof in a relaxed but relevant environment and it works very well for us.”

The company is once again sponsoring the bar and reception area at HEVAR, again an opportunity that has paid dividends for the company, raising awareness of the brand and the wide range of products it offers along with its comprehensive service capability.

At this year's show, Wilo will again be exhibiting its huge range of domestic and commercial pumps and pumping systems – for heating, air conditioning and refrigeration, water supply and sewage and waste water pumping and lifting solutions. The company has grown significantly in recent years and now offers a very real alternative pump supply option, one that is being recognised across the UK as more and more major companies choose Wilo as their preferred supplier.
